Birth: 12/27/1984
E-mail: d1urno@gmx.com
Current location: São Paulo, Brazil

Idioms:

| Spanish:	Native
English:	Fluent
Portuguese:	Fluent
German:	Beginner

PROFILE

Argentine living in São Paulo since January 2019, passionate about design, programming, logic and new challenges. Always based on continuous and self-taught learning of new technologies to better achieve my goals. Started creating apps since I was a teenager, going from Java game plugins to financial tools. Nowadays I find myself focusing in websites/apps involving TypeScript, Vue3/Nuxt, TailwindCSS, Graphql and serverless architectures as my main stack.
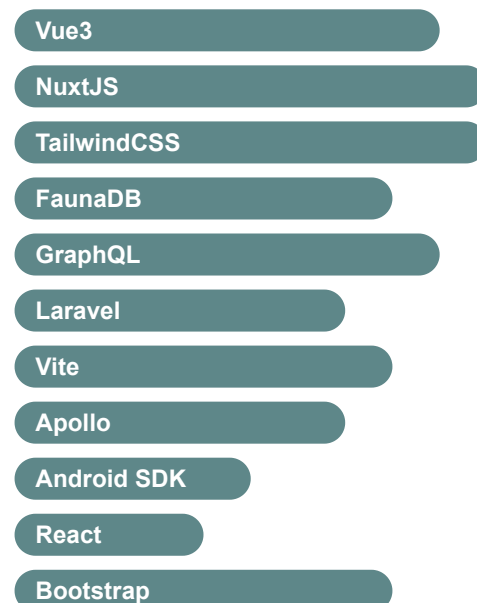

TECHNICAL SKILLS

Ordered from top to bottom, skills I'll be more likely to work with. The horizontal extension of each bar represents actual knowledge/experience I do have on such.

Languages

- Go
- TypeScript
- JavaScript
- Kotlin
- Java

- GraphQL
- Laravel
- Vite
- Apollo
- Android SDK
- React
- Bootstrap

Other

- JAMStack
- Drupal (Headless)
- API
- Docker
- GitHub
- BitBucket
- Parcel
- Gulp

Infrastructure

- AWS
- Netlify
- Vercel
- GitFlow
- CI/CD
- Pipelines
- Digital Ocean
- Heroku

RECENT EXPERIENCES

2020

Institutional Website - Matera Fintech

https://matera.com

Project lead developer, code review, dedicated both on backend and frontend using Drupal Headless, GraphQL API. Frontend using NuxtJS with Vuex, i18n for internationalization, TailwindCSS, static generated configuration (JAMStack) and my own open-source module nuxt-image-extractor.

2019

Institutional Website - Paraná Banco

https://paranabanco.com.br

Project lead developer, dedicated to backend using Drupal Headless exposing a GraphQL endpoint and DevOps tasks as CI/CD in cooperation with Bank's developer team. Collaborated on frontend with my team using React (Hooks, Styled components, Redux) and Apollo Client.

2019

Full-stack Developer - Ctrl365

https://ctrl365.com.br

During this period I've been responsibly for different tasks, such as responsive landing pages for brands like Acer, Consul or Nestle in parallel with art department, I've built a complete intranet with login and notifications, or APIs and database administration tasks. I did many job interviews with candidates to grow our team, among other team management tasks.

You can inspect the source code of this page, it was made using Vue, TailwindCSS, i18n and Parcel.

Lighthouse 6.0 desktop score:
